

Stoner**Stoner® TraSys® 4000**
RotoFlow™

Stoner® RotoFlow™ helps reduce scrap by 40%.

Stoner® RotoFlow™ was developed to solve quality and production challenges that many rotational molding professionals face - reaching the inserts, tight radii, threads, and deep cavities of hard-to-fill parts.

RotoFlow™ increases the flow of polyolefin and nylon resins into these difficult areas producing a fully molded part and nearly eliminating voids, pinholes, bridging, thinning, and static lines on the surface.

Item # TraSys 4000

Before

After

Molders prefer Stoner® RotoFlow™ because:

- Improves the quality and consistency of rotomolded parts.
- Removes pinholes, voids, and blow outs.
- Improves the appearance and operational performance of threads.
- Increases the strength of inserts.
- Contains no CFC or HCFC propellants.
- Contains no chlorinated solvents.
